PROFESSIONAL SUMMARY

Self-taught full stack developer with a Civil Engineering background and a passion for problem-solving through code. Experienced in building web applications using Django, the MERN stack, and RESTful APIs. Strong foundation in JavaScript and Python. Open to entry-level software engineering roles where I can grow and contribute.

SKILLS

Languages: JavaScript, Python, C#, Php, SQL, HTML, CSS

Frameworks/Libraries: Django, ReactJS, NextJS, TailwindCSS, NodeJS, TypeScript

Tools & Platforms: Git, GitHub, VS Code, Postman, Supabase, Docker

Databases: PostgreSQL, SQLite, MongoDB

Other: REST API, JWT Auth, Responsive Design, Debugging

EXPERIENCE

Technician (Self-Taught / Freelance)

2020 – 2025

- Independently learned and applied troubleshooting skills to repair laptops, desktops, and mobile devices.
- Reinstalled and configured various operating systems including Windows, Android, and Linux..
- Performed system cleanups, driver updates, and performance optimizations.
- Helped friends, family, and local clients fix hardware and software issues.
- Gained hands-on experience in diagnosing technical problems and delivering practical solutions.
- Developed strong problem-solving, research, and customer support skills through real-world cases.

EDUCATION

Bachelor of Science in Civil Engineering

Cotabato State University, 2018 – 2023

Self-Taught Full Stack Developer

2024–Present | *Ongoing Learning through Projects and Documentation*

PROJECTS

easCE Reviewer App

Technologies: *MERN Stack, Next.js, Tailwind CSS, TypeScript*

A

reviewer app for Civil Engineering students and graduates preparing for the board exam. Built using the MERN stack with Next.js for SSR and Tailwind CSS.

E-Commerce Platform

Technologies: *React, Node.js, MongoDB, TypeScript, Next.js*

full-stack e-commerce platform developed for my sister's furniture business. Includes product management, user authentication, and Stripe payment integration.
